Eight ladder stamps = full chess. All eight boxes stamped means you played a complete real game with all thirty-two pieces and both rules that end the night: checkmate and stalemate. That is a real chess player's paper. Frame it, or keep going.

If you make it to a tenth night, ask the host about the free take-home comeback guide and the puzzle site in your browser — same friendly voice, more ideas, and your passport still travels with you.

Print free • one sheet travels in a backpack • hosts initial inside the circles; stickers are also legal tender
